

# John Deere and Nortrax: Changing the game, again

COURTESY OF NORTRAX

John Deere is the world's leading engineer and manufacturer of forest machines, and offers the most comprehensive line of forestry equipment for road building, harvesting, extraction, loading and reforestation. This year, Deere introduced the new game changing L&M Series. It promises to be the strongest, most productive forestry machines John Deere has ever offered.

Three years in the making and backed by over a half-century of experience in the woods, the John Deere M-Series Tracked Feller Bunchers and Tracked Harvesters are officially making their debut. The latest additions to the John Deere family of tracked forestry machines include the 800M and 800MH-Series Reduced Tail Swing, setting a new standard in midsize machines, along with the 900M and 900MH-Series that improve upon John Deere's industry-leading large-size machines.

## Celebrating 50 years of skidder manufacturing

In 1965, John Deere introduced the 440 Skidder, and has continued to change the game for loggers with safer, more reliable and more productive machines ever since. This customer-inspired commitment to quality lives on in 2015 through the introduction of the L-Series, a celebration of John Deere's 50th anniversary manufacturing and designing skidders. Built on 178 years of groundbreaking innovation, backed by over a half-century in the woods and designed with proven components to withstand the toughest environments, these machines represent the best that is in John Deere as a manufacturer.

"The 50th anniversary of our first skidder is a major milestone that demonstrates John Deere's unmatched commitment to developing equipment solutions for the types of challenges loggers face in the woods every day," said Marty Wilkinson, vice president of Worldwide Forestry & Business Development, John Deere Construction & Forestry. "We are proud of the legacy we've built in the skidder business since 1965, but it doesn't stop here. We will continue to listen to loggers, innovate and respond with machines that deliver on the most important features to our customers."

Nortrax is your John Deere forestry equipment dealer. Nortrax operates over 40 forestry, construction, and mining dealerships throughout Eastern Canada, the Midwest, Northeast, and Southeast Regions of the United States. We specialize in new, used and rental equipment of John Deere and other key brands. Our parts team stocks an impressive selection for all leading equipment brands and our factory trained technicians service all makes and models.
